Three talks. One mission. Available in English and Spanish.

AI GOVERNANCE

The AI Governance Gap: What It's Costing Your Organisation

Most organisations aren't failing at AI because of the technology. They're failing because nobody decided who was accountable, what the rules were, or what would happen when something went wrong. Based on the MATRIZ framework – practical, urgent, and directly relevant to anyone

BEST FOR: Corporate events · HR & L&D conferences · Legal and compliance audiences

30 min

AI BIAS + INCLUSION

Built on Bias: What AI Learned From Us

AI doesn't invent prejudice – it inherits it. From the data it was trained on, the teams that built it, and the organisations that deployed it without asking enough questions. Research-backed, honest, and designed to make a room uncomfortable in exactly the right way.

BEST FOR: Tech conferences · Diversity & inclusion events · Marketing and media audiences

30 min

AI FOR EVERYONE

AI: For the Room That Was Never Invited

For the audiences who have been told – directly or indirectly – that AI isn't for them. The non-technical professionals, the women who stay quiet in Q&As, the people who say "I didn't know we were allowed." A talk about confidence and who gets to shape this technology.

BEST FOR: Women in tech events · General business conferences · Keynote slots

What Audiences Say

Real feedback from real rooms.

“ Her talk was my favourite of the whole event – though 'favourite' might not be the right word, given how terrifying some of the research and insights were. A REAL eye opener. I've already been sharing it with my colleagues, my partner, and most importantly my daughter. Thank you for sharing.

Digital Results Director · Technology Sector · Brighton SEO

“ Her perspective is always refreshing and encourages us to think differently.

CEO

KSDigital Marketing Agency

“ Great talk to open the day with – thinking about AI without panic or wild optimism.

Senior Developer

ArunStates

“ Brilliant and eye-opening talk.
